

## 2019 Corporate Council Membership

The Corporate Council provides members with an opportunity to meet face-to-face with past and current ASTCT leadership in an informal, collegial environment. Our goal is for ASTCT and Corporate Council members to:

- Establish meaningful dialogue between industry and BMT thought leaders – ASTCT’s current leadership, past presidents and the Board of Directors.
- Share information, advice and assistance in developing new products and services to improve blood and marrow transplantation and cellular therapy.
- Discuss critical BMT issues of mutual concern, find solutions to pressing challenges, share knowledge on best practices and advise ASTCT on its major initiatives.
- Create workgroups and demonstration projects to address specific BMT issues.

Senior executives from member organizations participate in Council meetings. Guests are also invited based on their expertise to cover agenda topics. This structure offers the broadest possible perspective for knowledge sharing. By pooling their resources and expertise, the Council engages in joint problem-solving and collaborative opportunities that will advance the cause and culture of blood and marrow transplantation and cellular therapy.

### Key Benefits:

- *Knowledge Sharing:* The Council is about problem solving. Members will come away from meetings armed with action plans based on the experiences of their peers, who have addressed similar challenges and succeeded. Plus, the open discussion of emerging trends will keep Council members ahead of the curve and able to anticipate future challenges.
- *Partnership:* Corporate industry leaders will be able to work alongside ASTCT Board member leadership, past presidents, accreditation leaders, healthcare providers and transplant center executives to improve quality outcomes. They also will be encouraged to establish dialogues to identify opportunities for collaboration.
- *Advocacy:* Stay informed on our work regarding coverage of HCT for various diseases, national advocacy against proposed changes to policies and decreased funding for research and on-going advocacy in relation to reimbursement.

**Current members:**

- Actinium Pharmaceuticals
- Amgen, Inc.
- Atara Biotherapeutics
