In JV Venable's new book, *Breaking the Trust Barrier* (18.95, June, 2016, Berrett-Koehler), Venable uses hundreds of personal stories – some humorous, but all indelible, to bring the the Thunderbird process of building and leading high performing teams to life. *Breaking the trust barrier* offers a repeatable, predictable process that can be used by any leader in virtually any situation.

Carrying a follower across the threshold of trust in jet demonstration business is magical. This is where we maximized the impact of our team – where the mutual effects of proximity streamlined the efforts of every man in the formation, delivering a surge of momentum that literally lifted the wings of my jet. Breaking that same barrier in business means bringing your people in close enough to streamline their efforts – and yours, allowing your organization to accelerate to a level of performance you could never have achieved any other way.
