## GREAT READS + PODCASTS

### **The Art of Waiting: On Fertility, Medicine, and Motherhood**

By Belle Boggs

This writer's exploration of her own fertility journey was first published in 2012, but the questions it raised remain relevant still. Boggs details her own treatment, and the years-long uncertainty that clouded it, but also delves into the complicated ethics and conflicting motivations of the business of IVF. If you are a practitioner moving through your day-to-day in this world, it is a refreshing reminder not only of the patient experience, but also of fertility medicine's weakest links and our call to address them. It is an energizing nudge to evaluate your own practice with a more critical eye, and push for the answers Boggs sought for herself over a decade ago.

**Bring to ASRM 2025!**

**Meg Beal, PA-C**

Medicine  
Specialists  
Chapel Hill, NC

Meet Meg, who has worked for two and a half years in REI (11 years in Internal Medicine).

### What is your favorite part of working in Reproductive Medicine?

This area of medicine is very special for so many reasons. Getting to be part of helping build people's families and helping them through what can be a very difficult time is both meaningful and rewarding. Having experienced infertility myself, I am grateful to get to be on this side of things, helping people navigate their own journeys. I really enjoy the personalized nature of the care we provide as well.

### What is your best piece of career advice?

A couple of things: Always embrace the opportunity to learn new things. Do what you enjoy and enjoy what you do!

### What do you like to do in your leisure?

I enjoy spending time with my family, exercising at Orange Theory, reading, and recently started learning to play Mahjong!

### Current shoutouts for the AP3G initiatives?

The inaugural AP3G conference was such a great success this past March, and I am really excited to see where it goes and how it grows moving forward!
