SPRING 2025

AP3G NEWS

What's Happening

-APP 2025 was a blast (picture of the planning committee above). Our inaugural APP conference brought 150 APPs from across the country to Nashville, TN, for exciting lectures and exceptional networking. We have already started planning for APP 2026 for a larger venue (with tables!).

-The abstract application window for ASRM 2025 is OPEN through April 30, 2025! There is an APP Category and APP Prize Abstract/Poster Award!

Looking for assistance? Reach out to our Research Committee Chair: Susanne Quallich, quallich@med.umich.edu

FUN FACT: Susanne Quallich, is the AUA APP of the Year

-Approaching Excellence: A monthly enrichment Series for APPs on various topics. Register by clicking Events on our website.

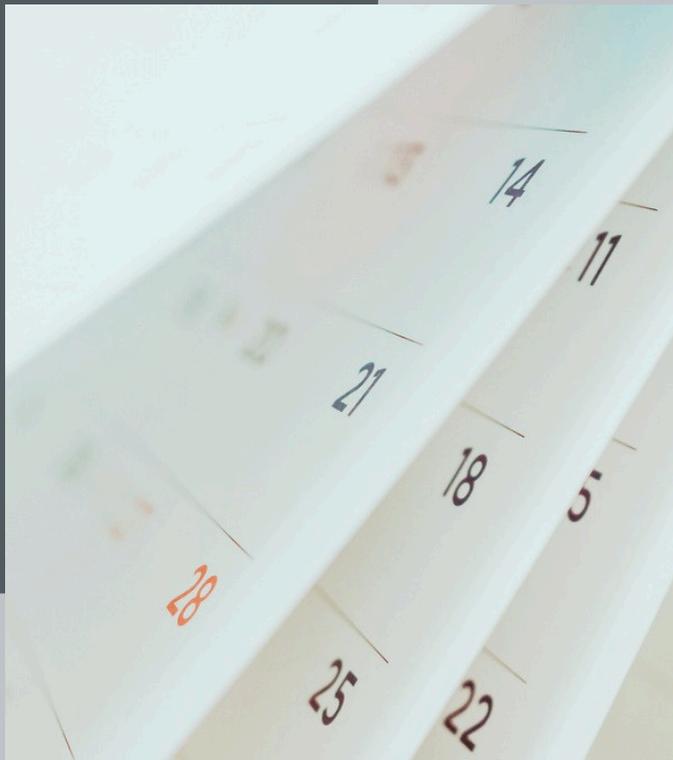

-APP Incubator: Monthly webinars offered to "New to Practice APPs" as a means to network with others learning the ropes. Register by clicking Events on our website.

-APP Fundraising Campaign- Support APPs to attend the next APP Conference.

-AP3G Merchandise: APP t-shirts and sweatshirts are for sale in the ASRM shop to support our Scholarship fund.

REMINDERS

- The NCC Reproductive Health and Infertility Certification Exam is available. SIGN UP now for a FREE SECOND CHANCE.
- Submit abstracts for ASRM 2025 by April 30, 2025.

GREAT READS + PODCASTS

Beating Endo

By Iris Kerin Orbuch, MD and Amy Stein, DPT

An endometriosis surgeon and physical therapist co-authored this book, which provides a multidisciplinary and holistic overview of endometriosis pathophysiology, treatment, and management. They deeply delve into often overlooked symptoms of endometriosis and provide detailed but digestible case-studies. It is an approachable, patient-centered read that is a great recommendation for newly diagnosed patients. For providers, it is a helpful tool in understanding disease presentation and the patient experience, and creating a tailored, multidisciplinary treatment plan.

Bianca Weaver,
APRN, CNM

Kentucky Fertility Institute
Louisville, KY

Meet Bianca. APP Incubator lead. 6 months into practice in REI (6 years prior as a delivering CNM).

What is your favorite part of working in Reproductive Medicine? What isn't my favorite part is the better question!! I truly love how there are so many opportunities to be impactful in your practice. This is such a stressful/sensitive time in our patient's lives and I feel quite honored to be involved in helping families grow. I also find it so interesting how the field is evolving. I love how there is always a new article to read or a new practice to adopt. I haven't been practicing long enough to say this is my favorite part, but I think my most favorite part will be seeing all the babies!

What is your best piece of career advice? I think it is extremely important to be in a supportive environment to facilitate your career development. I have been fortunate enough to be in practice with some extraordinary providers (shout out to Dr. Hunter and Yllena, APRN) who have always supported me and helped me further my practice. You have to be able to feel comfortable to learn and make mistakes and know they will be a non-judgmental resource for you through those growing pains. I love being able to go to my physician and APP colleagues and ask questions and bounce ideas off them. They are wealths of knowledge that I gladly use as resources!

What do you like to do in your leisure? I love spending time with my two IVF miracle boys (4.5 and 1 years old), my husband and my dog Pepper. We have almost 4 acres so we spend a lot of time outside playing in the creek and in the mud!

Current shoutouts for the AP3G initiatives? I am so proud of all those who led the recent APP conference! It was SUCH an amazing opportunity to network and learn from some fantastic speakers, APPs and MDs alike! I hope more APPs can go next year because it was so beneficial. Tamara showed us her clinic's miscarriage kit and it is something we are implementing now because of her! Big thank you to all those who contributed!!!
