APProaching Excellence: Webinar series

Now offering CME!

Monthly Enrichment Series for APPs on various topics.

REGISTER in Events on our Web page.

To receive CME you will need to complete the survey following the webinar.

GREAT READS + PODCASTS

Talk with Turek: Episode 3 Transforming Fertility
(Why Men Matter!)
with Dr. Janet Choi, Progyny CMO

Dr. Turek is an internationally recognized Reproductive Urologist. His podcast, Talk with Turek, delves into men's sexual health and fertility as it stands (and where it's headed). Dr. Choi is the former medical director of CCRM NY, and current CMO of Progyny. This episode touches on the potential clinical AND cost benefit of male fertility coverage and early evaluation - and simply a great conversation between leaders in the field.

Staci Gorson, MS, APRN, FNP-BC
Kindbody, Chicago, IL

Meet Staci . 10 years working REI, and 20 years in Women's Health.

What's your favorite part of working in Reproductive Medicine?

I love supporting patients through one of the most meaningful journeys of their lives- combining compassionate care with evidence-based medicine to help them build families, while also helping to shape the ever-evolving role of APPs in the REI setting.

What is your best piece of career advice? The best advice I can share is to remain engaged and adaptable. Reproductive medicine is rapidly evolving, and a commitment to continuous learning, collaboration, and flexibility enhances both professional growth and patient outcomes.

What do you like to do in your leisure? Outside of work, I love spending time with my husband and our two girls. You can usually find me out on a run or poolside cheering loud as a proud swim mom.

Current shout outs for AP3G initiatives? I'm excited to continue building a community and resources for APPs in reproductive medicine through AP3G. I'm especially looking forward to growing education opportunities, networking and advocacy for our role in advancing fertility care.
