Covid Protocol

The following safety protocols will be implemented:

- All participants must show proof of full vaccination (2 mRNA + booster, or J&J + booster), or proof of a negative PCR Covid test within 72 hours prior to the event (participants not yet boosted will need to provide proof of a negative PCR Covid test as well).

- During the conference, there will be **mandatory masking for all participants during the conference**. Attendees must wear either a surgical or N95/KN94/KN95 mask (no cloth masks; cloth masks can be worn over a surgical or N95/KN94/KN95 mask).

- All roundtable lunches will be boxed; we recognize some participants may be uncomfortable unmasking around others but want to allow everyone the opportunity to engage in the discussion. We will be asking speakers to lead the discussion for the first half hour, leaving the second half available should participants want to eat their lunch in another location (there are many spaces throughout and outside of the conference center).

Attendees should also:

- Socially distance when possible.
- Stay home if sick or exposed to COVID-19; and
- Consult with a healthcare provider about attending if you have underlying health conditions or a weakened immune system.
