Likewise, “a nurse must disinfect her hands” is exclusive of males and stereotypes nurses as females.

INSTITUTIONAL RACISM
It is widely accepted that racism is, by definition, institutional. Institutions have greater power to reward and penalize. They reward by providing career opportunities for some people and foreclosing them for others. They reward as well by the way social goods are distributed, by deciding who receives institutional benefits.

INTERNALIZED RACISM
When individuals from targeted racial groups internalize racist beliefs about themselves or members of their racial group. Examples include using creams to lighten one’s skin, believing that white leaders are inherently more competent, asserting that individuals of color are not as intelligent as white individuals,
believing that racial inequality is the result of individuals of color not raising themselves up “by their bootstraps”. (Jackson & Hardiman, 1997)

INTERSECTIONALITY
An approach largely advanced by women of color, arguing that classifications such as gender, race, class, and others cannot be examined in isolation from one another; they interact and intersect in individuals’ lives, in society, in social systems, and are mutually constitutive. Exposing [one’s] multiple identities can help clarify the ways in which a person can simultaneously experience privilege and oppression. For example, a Black woman in America does not experience gender inequalities in exactly the same way as a white woman, nor racial oppression identical to that experienced by a Black man. Each race and gender intersection produces a qualitatively distinct life.

Such communications are usually outside the level of conscious awareness of perpetrators.

Scientists agree that there is no biological or genetic basis for racial categories.

RACIAL EQUITY
Racial equity is the condition that would be achieved if one’s racial identity is no longer predicted, in a statistical sense, how one fares. When this term is used, the term may imply that racial equity is one part of racial justice, and thus also includes work to address the root causes of inequities, not just their manifestations. This includes the elimination of policies, practices, attitudes and cultural messages that reinforce differential outcomes by race or fail to eliminate them.

RACIAL PROFILING
The use of race or ethnicity as grounds for suspecting someone of having committed an offense.

RACISM

SOCIAL OPPRESSION

WHITE FRAGILITY
Discomfort and defensiveness on the part of a white person when confronted by information about racial inequality and injustice.

WHITE PRIVILEGE
White Privilege is the spillover effect of racial prejudice and White institutional power. It means, for example, that a White person in the United States has privilege, simply because one is White. It means that as a member of the dominant group a White person has greater access or availability to resources because of being White. It means that White ways of thinking and living are seen as the norm against which all people of color are compared. Life is structured around those norms for the benefit of White people. White privilege is the ability to grow up thinking that race doesn’t matter. It is not having to daily think about skin color and the questions, looks, and hurdles that need to be overcome because of one’s color. White Privilege may be less recognizable to some White people because of gender, age, sexual orientation, economic class or physical or mental ability, but it remains a reality because of one’s membership in the White dominant group.
