Welcome! The webinar will start with a presentation, but there will be time for Q&A from the audience. When we reach the Q&A section, you can “raise your hand” using the reaction feature at the bottom of your zoom window. When you are called on, you can unmute to ask your question.

We are excited to have this as the first in our spring series!

Check out [https://www.aupha.org/education/webinarseries](https://www.aupha.org/education/webinarseries) to see our other offerings this spring.

Will the slides and/or images on the slides be available outside of this meeting? These images are very small so they cannot be read.

We will be posting the recording and slides on AUPHA’s website later this week.
We record all webinars, town halls, anything we offer AUPHA members virtually. Available for all AUPHA members on the AUPHA Network and/or the Website. And when new have something we think might also be of interest, relevant to students, we share on the Student Resources page on the Website, which is open to the public.

00:51:36  Eileen Alexander:

Thank you for addressing this very important topic. Certainly, health policy is within the realm of HSA. Are faculty qualified to teach environmental health & climate science? I ask as someone who has PhD from Dept of Env health in Med Coll. & MS in ecotox.

01:09:40  Daniel Gentry:

Seems like a topic that would lend itself well to interdisciplinary teaching and/or guest lectures for an intro survey type course in HCO, health systems, health management and policy. And with a full course elective course, lots of room for guests, experts from other health sciences fields like Eileen referred to. I was in three different SPHs, all strong in environmental health. Similar for comprehensive health sciences centers.

01:15:46  Daniel Gentry:

The Discussion Group on the AUPHA Network that Ryan just mentioned is open to all. Use the pull-down menu to go to “all communities.” Click on the community and join. Easy! But if you ever need assistance with the Network, Chris Sanyer is your go-to person on the AUPHA staff!

01:17:04  Lynne Trevisan:

At the beginning of the presentation, the percentages of greenhouse gases were shared and the presenter talked about the percentage coming from HCOs. Do we know specifically what the sources are?

01:18:13  Jenn Munt (AUPHA):

Thank you to our presenters today for sharing information on this important topic. As Ryan mentioned, there is a huge opportunity here to make an impact.

01:18:23  Jenn Munt (AUPHA):

If you have questions, you can drop them here in the chat or unmute and speak out loud.

01:21:42  Jenn Munt (AUPHA):
As we close out, I want to mention that next month, AUPHA will host a joint webinar with ACHE, NALHE, and NAHSE for members to learn about each organization’s faculty and student membership options and benefits. Learn more about this session and others in the spring series here: https://www.aupha.org/education/webinarseries.

01:23:12 Santosh Basapur: thank you everyone.

01:23:15 Diane Howard: Great job!! Thanks so much.

01:23:15 Lynne Trevisan: Great information today! I’m looking forward to adding assignments and resources to our program. Santosh, thank you for the infographic. It helped a great deal in understanding. : )

01:23:47 Daniel Gentry: Thanks to our presenters! And to everyone for joining us!

01:24:01 Joyce Anne Wainio: Great session!
