

Kathryn A. Phillips, PhD, is Professor of Health Economics and Health Services Research at UCSF. In 2008, she founded the UCSF Center for Translational and Policy Research on Precision Medicine (TRANSPERS), a global leader in developing objective evidence on the effective, efficient, and ethical implementation of precision medicine. She is also the Founding Editor-in-Chief of *Health Affairs Scholar – Global and Emerging Health Policy*.

Kathryn has conducted seminal work on generating and translating evidence for policy decision-making, examining how to effectively and equitably implement new technologies. She has published ~200 articles in major journals; has led NIH grants as Principal Investigator continuously for over 30 years; has served on the editorial boards for leading journals (*Health Affairs*, *Value in Health*, *JAMA Internal Medicine*); was a member of the National Academies of Medicine (NAM) Committee on Strategies to Better Align Investments in Innovations for Therapeutic Development with Disease Burden and Unmet Needs and the NAM Roundtable on Genomics and Public Health; serves on an evidence review committee for the Institute for Clinical and Economic Review (ICER); and has served/is serving on the governing Board of Directors for Genome Canada and as an advisor to the FDA, CDC, AHRQ, President's Council of Advisors on Science and Technology, and White House Office of Science and Technology Policy as well as many tech/pharma companies and venture capitalists. Kathryn has degrees from UT-Austin, Harvard, and UC-Berkeley.
