

FLIGHT LOG

PRE-FLIGHT CHECK LIST

- ☐ Make sure the drone, controller, and batteries are fully charged.
- ☐ Inspect the drone, controller, and batteries for damage. If a drone component is visibly broken, do not use it. If a battery is puffy or swollen, do not use it.
- ☐ Check the wires to be sure they are connected.
- ☐ Be sure the motors are straight and not tilted.
- ☐ Make sure the arms are not loose.
- ☐ Check that the propellers have not come loose and are clear of debris like hair or dirt.
- ☐ Ask an adult if you have any questions before you fly.

	Date	Pilot Name	Flight Time	Task	Issues/Notes
