

## Breakout Session # 4

### Summary of Key Findings and Lessons Learned

- Liability continues to be debated between plaintiffs' and defense lawyers.
- Law enforcement investigation will not change much – at least initially.
- The insurance industry does not view AVs as an existential crisis, but views it as an opportunity to continue creating products that help people and companies manage risk.

## Breakout Session # 4

### Recommended Action Items

- Research the appropriate amount and types of data that should be captured, along with the methods of reliable storage.
- Cybersecurity measures need to be given more attention, including firewalls and domain separation.
- Clarify the sources and integration of critical data concerning infrastructure, weather, and road conditions.
