

# Communities

Through Members Connect you can view the Communities and your communities. You can also join other communities and change your subscription settings for communities.

➡ Visit your Communities: by going to the main community selection. The next screen allows you to view your communities, all communities or narrow your selection down to just community types or the name.

In this view, you can click on members to see the community members, view the discussions or view the library.

 You can view the information for a community by clicking on the name of the community. This will provide you a detailed snapshot of the community including discussions, library, blogs, shared files and any announcements.

## Open Forum

 Each CEFPI member can create their own community by clicking on the 'Create a New community link'

## View Communities

Search    [Advanced Search](#)

**All Community Types** [change](#)

There are 17 communities in this grouping

**Create and manage your own community:** from here you can name your community, provide a description and determine who can join your community or if you want to specifically invite members to join. You can create a closed community by invitation only- these types of communities will not be open to the general membership. Be sure to select Discussion and Library for each community so you can communicate and share files.
