

Miranda Verity Marwenze

I am very passionate about the financial markets and my ambition is to become an Asset Manager. I started gaining interest in 2020 when I was introduced to the international capital markets via forex trading. From there I learnt the fundamental and technical aspects of trading and have gained 3 years' experience of retail trading. Due to my ambition, I also gained interest in our local financial markets and took free courses on the ZSE, started analyzing and researching about this market. I also gained interest in Blockchain technology, and did an online Diploma course on blockchain technologies and would like to continue expanding my knowledge in the fintech space.

Miranda holds a Bachelor of Risk Management and Insurance from the National University of Science and Technology, and a Diploma in Blockchain Technology and Applications from ALISON

Miranda started her career as an Industrial Attachment at BANC ABC in 2018. She then worked at Moonlight Funeral Assurance in 2021 as a Graduate Trainee. Miranda is currently a Trade Finance Specialist at Euro Exim Bank

Her interests are Analyzing the financial markets and trading, financial literature reading, hockey and golf, social interactions and networking
