

Markets only reward the focused. 📈 Bear in mind, this reward is currently Lahore based.

Here in Sarmüz Investments Limited (SÜ), we've spent 13 years managing long-term funds like Provident, Pension Funds etc. without the noise. As an SECP-licensed NBFC in Lahore, we're trying to get better at dissecting the market and that's where your role comes in.

We are expanding and looking for people who can find the signal in the data, and who understand that "risk" is more than just a calculation on a sheet.

The Openings:

Portfolio Manager (3–5 Yrs Exp): For those who have navigated the volatility & the current joyride and still have an appetite for alpha.

Investment Analyst (0–2 Yrs Exp): If you enjoy reading 30-page annual reports and Fund Manager Reports more than your social media feed, we should talk.

The Internship: This is a fast-track to a permanent seat for those who prove they belong at the table.

What We're Looking For:

Numerical Fluency: Whether you're a Finance grad or an Engineer, if you can make data tell a story, you're in.

The CFA Grind: Level I, II, or enrollment is highly preferred.

Excel excellence: If you still use a mouse for your spreadsheets, this might be a difficult transition.

Why Sarmüz?

We offer no fluff and just deep fundamental research, sophisticated strategy development, and the chance to build a career that actually moves the needle.

Think you're a fit?

Don't send a generic cover letter. Send a resume that shows your impact.
