

Financial and Investment Analyst - AI trainer

micro1 · APAC (Remote)

Job Title: Financial and Investment Analysts

Job Type: Full-time or Part-time

Location: Remote

Job Summary:

Join our customer's team as a Financial and Investment Analyst and play a critical role in shaping the future of intelligent financial systems. You will leverage your expertise to analyze complex financial data, interpret market trends, and provide essential insights that guide our AI-driven valuation and investment strategies.

Key Responsibilities:

- Analyze financial statements, market data, and economic indicators to identify investment opportunities and risks.
- Collaborate closely with AI product teams to guide algorithmic understanding of valuation and forecasting models.
- Develop comprehensive financial forecasts and build scenario-based models to support strategic decision-making.
- Conduct deep-dive assessments of industry trends, macroeconomic conditions, and competitive landscapes.
- Translate complex financial concepts into actionable recommendations for AI development and deployment.
- Ensure high-quality, accurate, and reliable risk assessments to support business goals.
- Communicate findings effectively through well-crafted written reports and engaging verbal presentations.

Required Skills and Qualifications:

- Bachelor's degree or higher in Finance, Economics, Business, or a related field.
- Proven experience analyzing financial data and market trends in a fast-paced environment.
- Advanced proficiency in financial modeling, forecasting, and valuation techniques.
- Exceptional written and verbal communication skills, with a keen attention to detail.
- Strong analytical mindset and the ability to solve complex problems independently.

- Experience collaborating with cross-functional teams, especially in AI or technology-driven industries.
- Demonstrated ability to deliver clear, concise insights to both technical and non-technical audiences.

Preferred Qualifications:

- Professional certifications such as CFA or FRM.
- Experience guiding AI or machine learning models in financial domains.
- Background in economic research or investment strategy development.

As a key subject matter expert, your input will directly influence the accuracy and reliability of our AI systems, driving impactful financial forecasting and investment decisions. If you are passionate about leveraging your financial expertise in a technology-first environment, we invite you to make a difference with our customer's innovative team.
