

Investment Analyst (Verified job)Investment Analyst

Nayatel • Islāmābād, Pakistan (On-site)

[About the job](#)

Job Overview:

The Investment Analyst will work as part of a team of Associates and Analysts, reporting directly to a Senior Investment Analyst or Investment Associate. This role is ideal for early career professionals with 1–3 years of experience in financial services, investment research, or related fields. The Analyst will support the evaluation of investment opportunities for international clients, including venture capital firms, multi-family offices, and institutional investors primarily in the GCC region. In this role, the Analyst will conduct research, financial modelling, valuations, and due diligence to produce high-quality investment deliverables. The position offers a dynamic, fast-paced environment with direct exposure to cross-border investment mandates.

Job Responsibilities:

- Prepare investment memos, pitch decks, and materials for the Investment Committee.
- Conduct valuation analysis using DCF, comparables, and precedent transaction methodologies.
- Develop financial models and perform sensitivity/scenario analysis.
- Support the formulation of investment recommendations based on research and modelling.
- Conduct in-depth industry and company research to support investment theses.
- Track macroeconomic developments, financial news, and sector-specific trends.
- Participate in post-acquisition monitoring of portfolio companies.

- Compile and summarize findings in high-impact internal and client reports.
- Actively contributes to team training and knowledge-sharing sessions.
- Support the review of junior analyst outputs and assist in mentoring where appropriate.
- Engage directly with clients or their representatives to clarify data and refining deliverables.
- Perform any other duties assigned by the supervisor or management to support team or organizational goals.

Key Requirements:

- Bachelor's degree in Finance, Economics, Accounting, or a related discipline from a top tier university (Masters preferred).
- CFA Certification (completed or in progress).
- 1–3 years of relevant experience in investment research, financial services, or consulting.
- Experience in financial modelling, valuation, and due diligence will be a plus.

Skills Required:

- Strong analytical and quantitative skills.
- Proficiency in Excel, PowerPoint, and financial databases.
- Familiarity with macroeconomic frameworks and market indicators.
- Clear communication and report-writing abilities.
- Ability to work under pressure and meet tight deadlines.
- Team-oriented, self-motivated, and detail-oriented.
