

## Job Description for Analyst - Advisory Services

### Reporting to Senior Management

Synergistic Financial Advisors (“SFA”) is providing corporate finance advisory services in Pakistan as well as in International markets with a primary focus towards the GCC region. SFA is providing analytical services to renowned Advisory and Private Equity firms located in Kingdom of Saudi Arabia (“KSA”). SFA seeks an Analyst to work under the senior executives to provide financial advisory services to our clients in KSA. Purpose of the position is to ensure that all relevant information has been gathered and assessed in the most efficient and cost-effective way, the Resource should be able to analyze data and draw recommendations based on client’s needs and market research findings (primary and secondary research), keeping in mind the project scope of work and timeline. Resource should be able to present findings and recommendations in a concise and visually appealing manner that is convincing and easy to understand.

### Job Description

- ❖ Conduct primary and secondary research on KSA markets
- ❖ Determine a creative and effective way to gather missing information.
- ❖ Conduct additional secondary/desktop-based research from reliable sources as required.
- ❖ Conduct the necessary field or desk-based research (on supply and demand analysis, macro and country economics from reliable sources) by site visits, structuring relevant questionnaires, building strong relationships within the industry as and when required.
- ❖ Compile the data gathered into standard research reports and publications using an appropriate and creative methodology.
- ❖ Assist in developing ideas and recommendations based on information gathered to design and organize a project involving quantitative and/or qualitative methods, as required.
- ❖ Contribute information (as and when acquired) to the SFA database.
- ❖ Gather, analyze and interpret complicated numerical information, assess and predict financial risks and returns. Use financial modelling to predict outcomes
- ❖ Develop financial models of different projects and draft investment documents
- ❖ Monitor market conditions and opportunities in all markets
- ❖ Gather and organize information on industry, competition and company. Update peer analysis and track earnings estimates. Review and comment on research reports
