

About: **Maiden Century**

We are a New York headquartered data analytics company sitting at the intersection of alternative data, predictive analytics and investment management. Our clients include some of the world's largest asset managers, who rely on our algorithms to make decisions impacting hundreds of billions of dollars in assets. Our data partners include the leading owners and distributors of alternative data, spanning from transaction to foot traffic to web usage data, and covering more than 10,000 companies around the globe in near real-time. We have seen strong double-digit growth in every operational and financial metric since inception, and are looking to recruit motivated, technically savvy and team-oriented colleagues to our mission of helping the world's decision makers get accurate, intuitive and real-time insights out of their data assets.

About the role: **Analyst, Research**

We are now looking to expand our research team in Karachi to better service the analytical needs of our growing and sophisticated client base. This position provides exciting opportunities to promising candidates to expand their professional horizons beyond Pakistan's nascent capital markets, and to work on cutting edge projects alongside some of the most forward-thinking, data savvy hedge funds, mutual funds and sovereign funds in the world. We expect candidates to be willing to thrive in a fast-paced startup environment, embracing challenges as opportunities for growth and innovation. The role will be based out of Karachi.

Key Responsibilities:

- Build financial models and translate them into algorithmically generated forecasts through coordination with the data science team.
- Conduct research on new sectors and companies on an as-needed basis.
- Maintain current models and run QA to proactively catch and fix any anomalies.
- Liaise on a regular basis with clients, sales, datascience, engineering and research teams.

Key Qualifications:

- A master's or bachelor's degree in finance or accounting, or related field.
- CFA designation preferred though not required.

Preferred Experience:

- Between 1-3 years of experience in investment management or securities research.
- Strong understanding of financial modeling, including the construction of income statements, balance sheets, cash flow statements, valuation models, etc.
- Strong and effective communication skills.

Compensation & Benefits:

- We offer a competitive salary based on the candidate's experience, qualifications and skills.
