

PACRA Looking for Senior & Joiner Criteria | Analyst

Description

Development and maintenance of financial and rating models on different platforms intended to quantitatively and qualitatively evaluate types of risks, utilizing historical data, renowned industry metrics, and self-built metrics.

- Writing and updating Rating Methodologies, detailing the approach adhered to in evaluating key risk considerations for a given entity type and financial instruments.
- Testing and validating models, thereby ensuring relevance, accuracy, fitness for the intended purpose, and the consistent application of rating criteria as outlined in relevant methodologies.
- Inspecting and updating pre-existing financial rating models, and recommending and implementing improvements based on user feedback, self-inspection, and internationally adhered-to standards.
- Collaborating with other organizational teams, along with external clients on a project basis, for the development of new financial products.

Requirements

CFA, ACCA or CA Finalist

- MS in Financial Management or MS in Accounting & Analytics, MBA preferred.
- Prior experience in criteria analysis or a similar role is a plus.
- Fresh graduates or candidates with 2-3 years of experience in building financial or statistical models intended to aid in decision-making, assess credit risk, perform valuations, assess project feasibility, generate forecasts, and conduct stress tests.

Apply before 10th November-23. See the below link
