Asthma	
ipratropium bromide metaproterenol terbutaline	Advair Atrovent HFA Azmacort Combivent Flovent HFA Foradil Maxair Proair HFA Proventil HFA QVAR Singulair Spiriva

Dear Member:

This reference list divides medications into generic and preferred Brand Name agents based on major therapeutic classes. Your plan requires the use of generic medications. If there is a generic available, that medication will be dispensed. The use of brand and non-preferred medications may result in higher copay. Present this formulary guide during your next physician visit.

This list is not all-inclusive, nor does it guarantee coverage. Changes to the preferred medications list can occur during the plan year and you are encouraged to ask your pharmacist to verify the current copay amount at the time your prescription is filled. If you need additional information regarding your prescription benefit, please refer to your summary of member benefits documentation, www.kpp-rx.com, or call 1-800-482-1285.

Attention Deficit Hyperactivity Disorder	
dextroamphetamine IR / SA/ dextroamph / amph salts IR / XR methylphenidate IR / SA methylphenidate ER	Strattera

Abbreviated Preferred Drug List of Common Drug Therapeutic Classes *
