## Collaboration Planning

Corenet Global 26/04/12 Confidential

5

### Collaboration Planning

- Office projects often provide companies with a driver to update the collaboration experiences
- Innovative collaboration solutions follow a strategy which is built on strong workforce profiling and planning
- Technology innovation is driving new ways of working
  - **Virtual Desktop**
  - **Extension Mobility**
  - **BYOD**
  - **Work from Anywhere**
- Real Estate savings from good design and use of technology can be significant
- Larger scale collaboration strategy will drive more innovative and business aligned office design and outcomes
- Solutions need to be simple, consistent and flexible

6

## Collaboration Design

Corenet Global 26/04/12 Confidential

7

### Collaboration Design

- New office collaboration solutions need to be designed to work with the broader strategy
- Office collaboration needs to influence workspace and meeting room design
  - **Collaboration Spaces**
  - **Collaboration rooms (not rooms with AV)**
  - **Telepresence**
  - **Collaboration tools across all devices (laptop/tablet/mobile)**
  - **Digital Media and Signage**
- Collaboration needs to be part of the broader technology innovation:
  - Solutions need to support BYOD
  - Solutions need to support virtual environments
  - Solutions need to be integrated into scheduling systems
- Solutions need to be designed to be easily repeatable, simple to deploy and support
