CoreNet Global
Central Europe Chapter
1. The Central Europe Chapter

1.1 Mission Statement

CoreNet Global's mission is to advance the practice of corporate real estate through professional development opportunities, publications, research, conferences, and chapters and networking groups.

1.2 Who We Are

CoreNet Global is a non-profit association, headquartered in Atlanta, Georgia (US), representing more than 11,000 executives in 50 countries with strategic responsibility for the real estate assets of large corporations. The organization’s mission is to advance the practice of corporate real estate through professional development opportunities, publications, research, conferences, designations and networking in 46 local chapters and networking groups globally.

1.3 Who Are Our Members

End Users are corporate occupiers and corporate tenants forming the industry's demand side. The end user membership base is diverse and spans industries including high-tech, financial services, manufacturing, pharmaceutical, telecommunications, healthcare, insurance and oil and gas.

Service Providers are strategic partners and outsourced service partners forming the industry's supply side. Virtually all corporate real estate departments partner with external service provider companies to deliver services needed to acquire, maintain and dispose of real estate. These services include but are not limited to brokerage, site selection, architecture and interior design, lease administration, facilities management, and technology platforms. One of the long-term trends in the CRE profession is toward leaner, smaller internal CRE teams focused primarily on strategy and client relationship management, with growing dependence on external service provider companies for tactical delivery and execution. Those external service providers are also members of the association.

Economic Developer - Also known as community development, as well as local, state or regional economic development corporations (EDC's), also on the CRE industry’s supply side. EDC's connect to CoreNet Global mainly from the standpoint that economic development and location strategies are an important part of the corporate end-user focus. EDC involvement includes government agencies, Chambers of Commerce, public-private partnerships (PPP's), universities, and many other interests.
Young Leaders may be corporate end users, service providers or economic developers. Young Leaders are CoreNet Global members who are 35 years of age or younger. Many have already attained executive leadership positions within their companies or organizations.

Academic Members are educators who spend not less than eighty (80) percent of their time researching or teaching in the field of real estate, corporate real estate or real estate related education.

Student Members are full-time or active degree candidates in real estate or related fields.

Journalist Members are full-time journalists working for a publication company.

Retired Members - Available for former active members only

2.3 Chapter Board’s Etiquette Statement

As CoreNet Global Central Europe Chapter professionals, we believe it is our duty to improve the value of our service to the organization using a thoughtful process that satisfies all members. As individuals, we are committed to the betterment of CoreNet Global and its chapter in Central Europe.

In being a member of the Chapter Board to the Central Europe Chapter, there are certain responsibilities and actions required. To help understand the level of commitment required as a member of our Chapter Board, we have developed the elements of Board Etiquette that are outlined below.

- When serving on the Board for the Chapter, it is a prime responsibility for a Board Member to lead a committee, organize a Chapter event or develop specific area for the Chapter. This responsibility extends to the development of future Board Members who will participate in these Chapter functions.

- It is expected that our professional goal is to concentrate on our Chapter’s objectives and achieve them within the framework of the highest professional and ethical standards.
• We see the value of each other’s knowledge and support in completing the work of the Chapter. For this reason, it is expected that we will attend all Board Meetings, Chapter Functions and the Global Summit being held on the European continent during our term on the Board.

We also recognize that each of us volunteers our time and there will be instances when we must miss these important events due to business and personal conflicts. When making a commitment to serve on the Board, a member shall have the clear intention to attend (in line with explanation of Section 7 to this Chapter Charter)

• **all Board Meetings**, being held face-to-face twice per year (Strategic Retreat and Planning Retreat);
• **75% of all Board Meetings**, being held as a telephone conference bi-weekly; and
• **strive to attend at least one of all other planned Chapter Activities (e.g. subregional platform event)** per year.

It is also expected that each Board Member will attend at least every two years **the Global Summit being held at the European continent**

• It is expected that during ones tenure on the Board, each member will “mentor” new Chapter members. This mentoring process is intended to make the new member feel welcome and encourage their participation in all CORENET GLOBAL activities.

• Although we are professionals and take theses duties seriously, it is anticipated that this should be a rewarding experience for each Board Member. Just as we work hard at the business of the chapter, it should be noted that we have fun, too.

3. **Special Interest Groups, Communities, Platforms and Initiatives**

The organizational setup of CoreNet Global consists of chapters, knowledge communities and special interest groups. Whilst chapters have a clear focus on a specific regional boundary (e.g. countries), members have also the opportunity to get involved in professional communities that provide global collaboration and engagement opportunities globally. Furthermore, CoreNet
Global operates also so-called Special Interest Groups (SIG) and so-called Knowledge Communities (KC). SIGs and KCs are a type of component and are forums for members to convene over a topic of interest that is not related to their industry. They are usually demographic in nature, and they are a great place for networking and best practices sharing.

Concurrently, the following KCs and SIGs are existent within CoreNet Global’s organization:

Communities

- Strategic Facilities Management Community
- Manufacturing & Industrial Community
- Sustainability Community
- Strategy & Portfolio Planning Community
- Workplace Community

In recognition of the wide range of industries, the decentralized structure and the numerous economic hubs within the countries covered by Central Europe Chapter, the chapter establishes platforms or initiatives serving specific subregions, stakeholders, initiatives or chapter activities as they are deemed supportive for the chapter operation or a value-add for the chapter’s membership.

The Chapter Board decides by majority vote on establishment or cessation of such platforms or committees. In order to ensure alignment and close liaison between the Chapter Board and the Central Europe Chapter’s platforms and initiatives, a representative of the ‘executive management committee’ leading the respective platform or initiative shall participate at Chapter Board’s meetings.

The organizational setup of our Chapter consists of special knowledge communities, special interest groups and platforms for our region:

- Platform South Germany
