## WHO WE ARE

CoreNet Global is a non-profit association, headquartered in Atlanta, Georgia (US), representing more than 11,000 executives in 50 countries with strategic responsibility for the real estate assets of large corporations.

The Singapore Chapter is Asia's most active and ethnically diverse Chapter, with over 300+ senior members representing a unique blend of global and local organizations. We also partner with local universities to nurture the next generation of CRE leaders from our student community.

We proactively design events featuring top caliber speakers who challenge the status quo.

Activities are highly interactive breaking the traditional mould and our social events bring members together to network, learn and share.

## OUR MEMBERS

We have a balance of End-Users and Service provider members ensuring a neutral platform for people to professionally connect.

End Users are corporate occupiers and corporate tenants forming the industry's demand side. The end user membership base is diverse and spans industries including high-tech, financial services, manufacturing, pharmaceutical, telecommunications, healthcare, insurance and oil and gas.

Service Providers are strategic partners and outsourced service partners forming the industry's supply side. Virtually all corporate real estate departments partner with external service provider companies to deliver services needed to acquire, maintain and dispose of real estate.

These services include but are not limited to brokerage, site selection, architecture and interior design, furnishing, lease administration, facilities management and technology platforms.

One of the long-term trends in the CRE profession is toward leaner, smaller internal CRE teams focused primarily on strategy and client relationship management, with growing dependence on external service provider companies for tactical delivery and execution. Those external service providers are also members of the association

## SESSION 1

# LEARNING JOURNEY

## The Robots came...and they stayed!

A fun, educational and interactive session that will take the participants through the journey of the evolution of 'robots'.

Where they came from, and how they have evolved from 'physical manufacturing equipment' that removed strenuous hard labor from our factories to the 'invisible' robots that trawl the internet or systematically brings 'data chaos' to 'data clarity'.

Or robots that can get where no human being could go before or robotic artificial pieces that can replace parts of the human body and ease what otherwise would have been a mentally trying or physical lifelong pain and challenge?

For sure, people are concerned about the 'robotic invasion', thanks part to Hollywood but also the lack of awareness from the benefits for humankind - if we understand how to maximize robotics and co-exist in a safe and harmonious society, perception may change for a more positive outlook?

## SESSION 2

## Neurodiversity – why it is good for business!

The Neurodiversity topic is becoming 'the topic' in the CRE industry and up there competing with other topics such as ESG and DE&I.

In this session we will explore what it is and what it's not! Bring clarity to the discussion and learn how to distill the many acronyms and references, in short; what does it all mean and how can and should I consider imbedding 'neurodiversity' into my Organization as an integral part of my value proposition when running and advertising my business.

We will also have interactive activities where we will explore the science and tools used to understand the complexity of how our brain is working.
