Session Descriptions

Greenfield Outdoor Fitness

Outdoor Fitness in Parks: Expanding Who We Serve with Durable, Low-Maintenance Design

Outdoor fitness allows parks to serve a wider range of users while remaining practical to operate and maintain. Explore how inclusive outdoor fitness options can increase park use without adding unnecessary maintenance burden. Attendees will learn how thoughtful planning, durable materials, and smart mechanical design reduce upkeep, improve safety, and extend equipment life. We'll take a look at the many types of outdoor fitness equipment available, get hands-on experience on a few fitness units, and examine a local outdoor fitness installation that successfully balances community impact with long-term operational efficiency.

California Turf Equipment

California Turf Equipment is a trusted source of turf-care and outdoor power equipment for over 40 years, providing professional-grade mowers, tractors, and turf-maintenance tools along with expert parts, service, and support to help landscape contractors, groundskeepers, and property managers keep lawns, parks, sports fields, and green spaces healthy and productive. With decades of experience serving the needs of turf professionals and homeowners alike, they can speak to the importance of reliable equipment, maintenance best practices, and tailored solutions that help customers maximize performance and extend the life of their turf and grounds machinery

CPRS Development & Operations Symposium

March 10, 2026 8:00AM – 2:00PM
Del Valle Park, Lakewood

Great Western Recreation

Great Western Recreation are seasoned experts in designing, planning, and delivering complete park and playground solutions that bring communities together through play, fitness, and outdoor recreation. With over 60 years of experience partnering with leading manufacturers like GameTime, they offer everything from inclusive playground equipment and outdoor fitness spaces to site amenities, splash pads, athletic courts, shades and shelters, dog park features, and turnkey project management — guiding clients from initial design concepts through installation to create vibrant, engaging outdoor environments for all ages.

Hunter

Waterwise and the future!

Come and experience the Hunter difference at the demonstration trailer. With a global reputation on innovation and water-efficient irrigation systems that help professionals make every drop count. As a leader in landscape, commercial, and golf irrigation, Hunter designs and manufactures a full suite of products — from high-efficiency rotors, nozzles, and smart controllers to weather-based systems and sensors — that save water and energy while creating healthier, more sustainable outdoor spaces; they also support their customers with training, technical resources, and solutions that span residential, commercial, agricultural, and sports-field environments. They will be presenting their new Wireless Valve Product, MCC Irrigation Controller and the complete line of turf rotors.

Rainbird

Rainbird, since 1933, they've been shaping the future of water management with innovative irrigation solutions designed to promote the Intelligent Use of Water™ and support sustainable landscapes around the world. With over 4,000 products used in agriculture, golf courses, sports fields, commercial developments, and residential settings, they lead the industry in water-efficient sprinklers, controllers, drip systems, and smart irrigation technology that help customers save water, reduce costs, and nurture thriving green spaces in both professional and everyday environments. Melton Design Group

Better Parks Through Partnership: Design, Maintenance, and Operations

CPRS Development & Operations Symposium

March 10, 2026 8:00AM – 2:00PM

Del Valle Park, Lakewood

Great parks depend on how well they function long after opening day. This session highlights the importance of partnering with maintenance and operations staff early in the design process. Through practical examples we will explore how design decisions affect long-term maintenance and daily operations. Attendees will learn how park staff and designers can work together more effectively and when maintenance and operations insight should be included during planning and design to support parks that are easier to maintain and built to last.

Target Specialty Products

Target Specialty Products is a trusted partner for professionals who manage pest control, turf and ornamental environments, and vegetation across North America. With over 80 years of experience and a network of 46 locations, they offer a comprehensive range of pest management products, specialty turf and ornamental solutions, application equipment, and industry-specific training and education to help customers enhance safety, operational efficiency, and environmental outcomes in markets like golf course maintenance, landscaping, forestry, vector control, and more. Come see what their products can do.

Turf Star Western

Join us and discover this long-established, trusted provider of professional turf and grounds equipment and services across the West Coast. They proudly distribute top brands like Toro, Club Car, Ventrac, and more, offering new and pre-owned mowers, utility vehicles, irrigation systems, parts, service contracts, training, and fleet support to help golf courses, parks, schools, municipalities, and landscaping professionals enhance the beauty, productivity, and sustainability of their outdoor spaces with innovative technology and dedicated customer care.

Turface

Turface will how they lead the market in delivering sustainable, high-performance solutions that protect soil and water resources while improving agricultural, horticultural, and industrial operations. As a global innovator in wood-fiber and porous ceramic technologies, they develop cost-effective, environmentally responsible products that enhance animal health, strengthen plant growth, and support efficient land and resource management—ultimately improving quality of life at work, at home, and at play.
