

MOSQUITO AND PEST ABATEMENT DISTRICTS

Districts protect our community's health

Mosquito and Pest Abatement districts were formed to **combat the threat mosquitoes** pose to the health and well-being of communities throughout the state

There are **57 Mosquito and Pest Abatement Districts** in California

For over 100 years, Mosquito and Pest Abatement Districts have **protected millions of Californians** against vector-borne diseases, such as West Nile Virus, Yellow Fever, and Malaria

Mosquito and Pest Abatement Districts **implement advanced surveillance, education, and enforcement techniques** for comprehensive vector and disease control programs

Mosquito and Pest Abatement Districts are committed to utilizing the most selective and least toxic vector control protocols to **protect the public health** as well as the health of the environment
