

# UTILITY DISTRICTS

## Districts empower our communities

Utility Districts provide communities with many **crucial services** such as electric power, water and sewage treatment services

Utility Districts provide **community-owned and not-for-profit services** to millions of Californians

There are **59 Utility Districts** throughout the state

Many Utility Districts **operate and maintain thousands of miles of water mains** and wastewater interceptor sewer lines, as well as water storage reservoirs and water treatment plants

Utility District **customers pay on average 43% less** than a customer with a private utility company
