

WATER DISTRICTS

Districts invest in a sustainable future

California Water Districts **support comprehensive solutions** to California's water challenges

Since 1887, Water Districts have **promoted conservation efforts** for public reduction in water usage and developed infrastructure to promote access to clean water for all Californians

There are **361 Water Districts** throughout the state dedicated to delivering water, conservation, and storage efforts

Water Districts **deliver water and treat wastewater** for more than millions of Californians

Water Districts **produced 5.6 billion gallons of water** to urban communities last fiscal year
