### **CSI AND BSD PLEDGE CONTINUED COLLABORATION AMID OWNERSHIP AND MANAGEMENT CHANGES**

The CEOs of the Construction Specifications Institute (CSI) and Building Systems Design, Inc. (BSD) say they're enthusiastic about the next chapter of collaboration following ownership and management changes at Building Systems Design, Inc. (BSD). They assured customers and members of the architecture, engineering, construction and owners' community that their relationship remains solid, as evidenced by the pledge from newly appointed BSD CEO Daimon Bridge to continue the organization's Platinum-level Corporate Partner relationship with CSI.

Mark Dorsey, CSI CEO, welcomed Daimon Bridge as BSD Speclink's new CEO. "We're glad to see Daimon rise from within the BSD ranks. His background and experience are especially important as we navigate the Schneider acquisition of RIB and BSD, as well as CSI exiting its position as a BSD shareholder. These changes mean important support for CSI learning and technical programs for the benefit of the industry."

Daimon Bridge, BSD CEO, affirmed his confidence in the solid relationship between BSD and CSI. "BSD has witnessed phenomenal growth over the past four years, and CSI's support has played a major role in our success. We look forward to our continued collaboration to serve professionals in the AECO community."

#### **About Construction Specifications Institute**

Founded in 1948, The Construction Specifications Institute ([www.csiresources.org](http://www.csiresources.org)) is a national association of more than 7,000 members dedicated to improving the communication of construction information throughout continuous development and transformation of standards and formats, education and certification of professionals to improve project delivery processes. CSI members work tirelessly to effectively communicate the designers' vision, the material producers' solutions and the constructors' techniques to create outstanding facilities that meet facility owners' objectives. For more information, please visit <https://www.csiresources.org>.

#### **About BSD SpecLink**

Founded in 1983, Building Systems Design, Inc. (BSD) provides advanced specification and interoperability solutions to architects, engineers, specifiers, and building owners nationwide. The company is focused on bringing technology to market that drives collaboration, simplifies design, and increases efficiency for all stakeholders in the design and construction process.
