

Daryl G. Robinson, FCSI

“For your commitment and contributions to the mission of the Institute through education and service; for your passionate and tireless work in education programs and seminars; for mentoring newer members and future leaders in achieving their goals within CSI and the construction industry; for over 18 years of creative leadership in the Pikes Peak Chapter; and for service to the Crandic Chapter, you are advanced to Fellowship in the Institute on the 14th day of September 2017.”
Providence, Rhode Island

DARYL ROBINSON was born in Burlington, Vermont in June 1960. His early years were spent as the proud son of a United States Air Force officer from Missouri and his wife from Georgia. Because of the military lifestyle, Daryl has had the special opportunity to live in many places all over the country. He even got to live in Tokyo, Japan for several years. Daryl's migratory life settled down when his family moved to Denver, Colorado in July 1970.

From his earliest childhood memories, Daryl was always drawing and building things. His favorite toys were Lincoln Logs and Tinker Toys. So, when people asked him what he wanted to be when he grew up, naturally he said that he wanted to become an architect, even before he learned how to spell the word correctly.

After graduating from Air Academy High School in May 1978, Daryl attended Texas Tech University, "Guns Up, Red Raiders!", where he earned a Bachelor of Architecture degree. His professional career then began in San Antonio, Texas in January 1984.

After a couple of years, Daryl and his young family left Texas and moved back to Colorado Springs, Colorado. He fulfilled his childhood objective when he passed the Architectural Registration Exam in 1990. Daryl is a licensed Architect in the State of Colorado.

In 1995, Daryl was encouraged by several of his coworkers to join CSI, and he became an active member of the Pikes Peak Chapter. Through the years, Daryl has served as president, treasurer, board member, and chair for a wide variety of committees. He also contributed to several special tasks for the chapter.

After studying for and passing the CDT exam in March 1996, Daryl became an enthusiastic advocate of the CSI Certification Program; you might even say that certification became his professional passion. In 2006, Daryl studied for and passed the CCS exam. He has been specializing in writing project specifications for several architectural firms for nearly 20 years to date.

Daryl desires to leave a legacy and build connections that cross generational boundaries. As a young professional, Daryl sought out mentors who could shed light on areas within the architectural and construction professions in which he hadn't yet had his own experiences. His indebtedness and gratefulness to those personal mentors has translated into a zeal to give back to those following him.

Through Daryl's involvement in CSI, he has become a leader and mentor to others. He has used many methods to reach and positively impact the careers of those who will lead the profession into the future.

CSI Membership

Pikes Peak Chapter, 1995
Crandic Chapter, 2013
