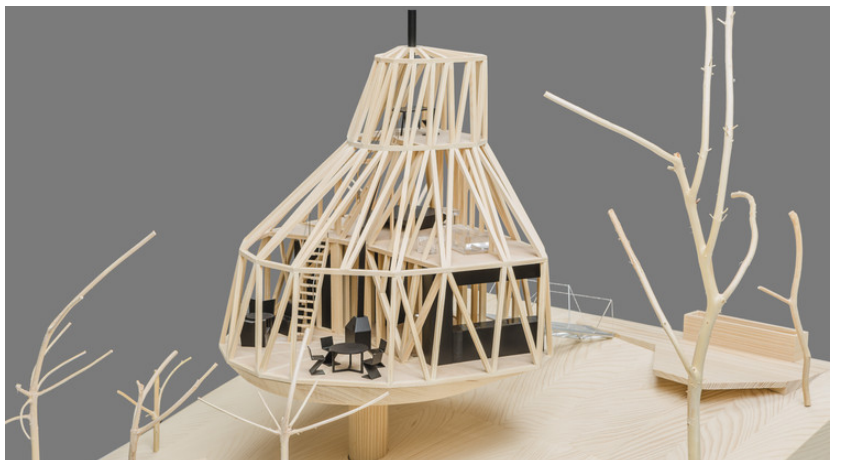
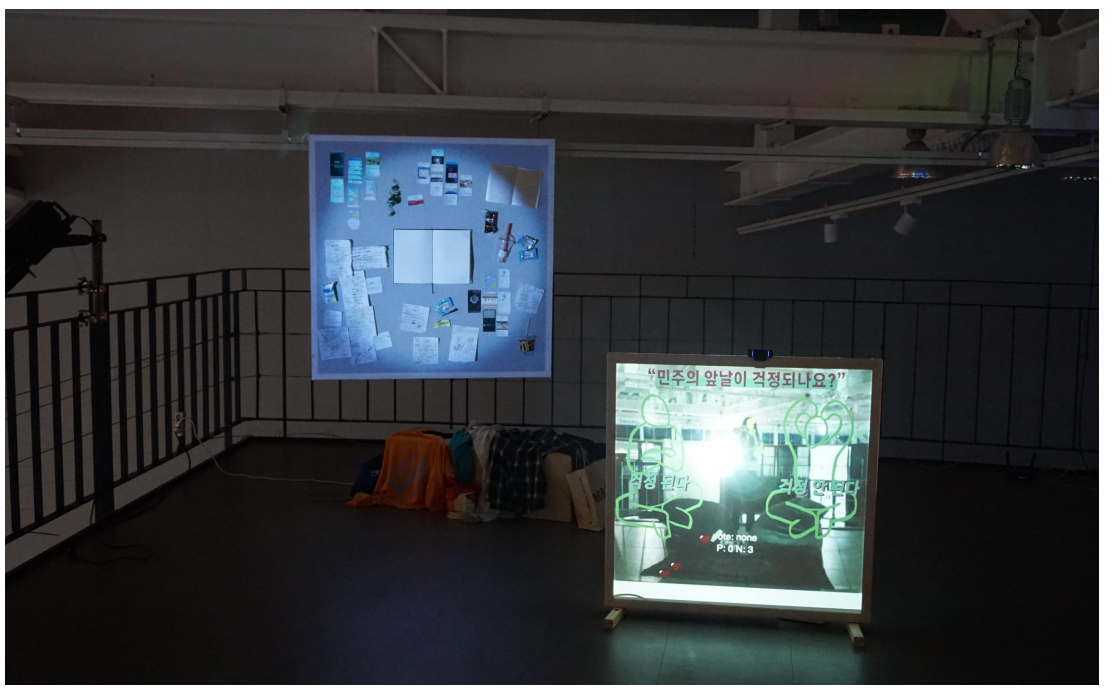
Smarter Home, Lauren Lee McCarthy

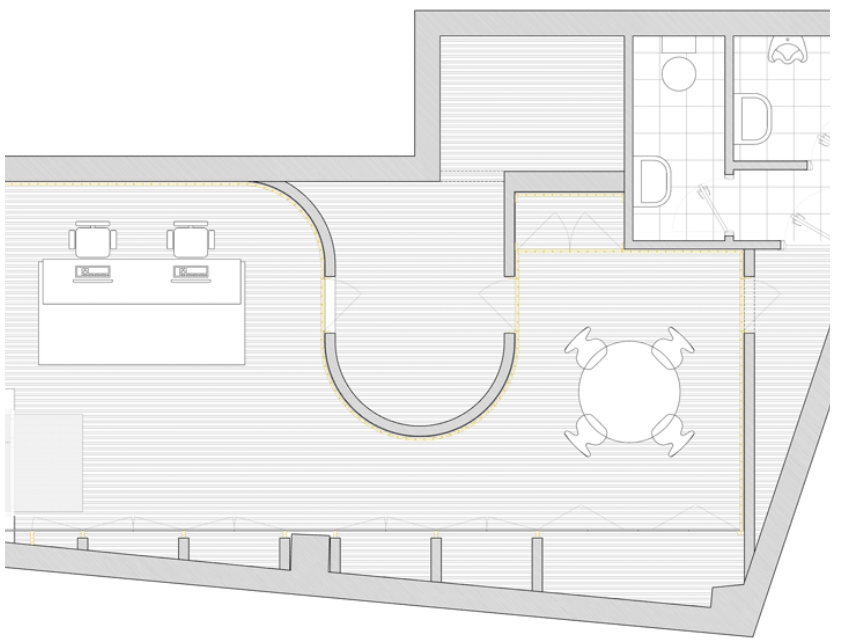
The Smarter Home / 더 똑똑한 집 American Arts Incubator Workshop reimagines smart homes of the future. “Home” is an idea we can all relate to—we have all felt at home at some point, whether it is a physical place, a group of people, or a way of being, But what makes someone feel “at home” and what does it mean to belong in a space, community, or city? And what might a future home look like, if we imagine one that is more inclusive?



Architectural model of outside space.



Close-up of installation view.



Plan for outer house.
