## MAURICE BAJCZ

### Coach, PPS Pittsburgh Science and Technology Academy

Apart from using CS Academy for the nth year, now for AP CS P, I have been converting all of my big projects in AP CS A to be "Creative Task" based, even if it's just taking Rock, Paper, Scissors and requiring the students to use three other objects of their choosing, it's really helped to drive interest and initiative further.

Any little bit to get them to put themselves into the projects, especially with the long slog of coding with Java the whole year. Wish me luck in doing Cybersecurity for the first time this Spring!

🌟 Let's celebrate Maurice's classroom adventures!
🎉 This year, he's transforming AP CS A projects into creative tasks. As he embarks on teaching Cybersecurity this Spring, let's wish him luck!
🍀 Thanks for being a member of our chapter!
