About These Resources

These resources have been compiled by the CCXP Advisory Committee to reflect a sample of literature that is aligned with the [CCXP Exam Blueprint](#) and would be useful in preparing to be a CX Professional or preparing to earn the CCXP designation. The document is reviewed periodically and resources will be updated as necessary.

While these resources are not required reading and should not be interpreted as constituting the sole source of all CCXP exam questions, candidates may find them useful when preparing for the exam. Each candidate should develop his or her own personal reading list and study plan based on individual needs and knowledge.

In addition to these resources, CCXP exam items can be referenced to any CXPA-curated knowledge — defined as information published or disseminated by CXPA, such as webinars, whitepapers, and member-curated content listed on [cxpa.org](#) in the [CX Toolbox](#) or [Member Resources](#).

Resources for the CCXP Exam

Since the Certified Customer Experience Professional (CCXP) program began in 2014, the most common question applicants ask is:

“How do I prepare?”

There is not one book, class or particular work experience to prepare you to meet the demands of being a customer experience professional. The well-rounded individual who meets the standards of the CCXP designation has benefitted from years of learning and experience in real world situations.

Reading is certainly a part of the process, so this guide provides materials infused with concepts and methods that are foundational to the customer experience practice. They are assembled from scores of recommendations received from customer experience professionals around the world. Our thanks to those generous people!

If you have materials that fuel your CX practice, send them to ccxpsupport@ccxp.org.
