

Patient Safety and Quality Poster Competition Abstract

Note: *This template is one example of an acceptable abstract. Your organization may follow a different format if it includes all the information in the headings below.*

Title: Short and specific; indicates the nature of the study/improvement

Team Members: Name

Organization: Name

Topic: Specify one of the accepted topics

Background: Briefly describe the background of the project and the problem that is being addressed

Goal: Briefly describe the aim or goal of the project

Learning Objectives: Provide three key learning objectives/takeaways of the poster

Methods: List the methods, actions, interventions and/or processes used to achieve the objectives. Describe the approach to the project.

Results: Summarize the key successes and difficulties in implementing the intervention(s). State results in detail, such as changes that occurred – process and outcomes. Lessons learned and degree of success can also be addressed. This should be the largest section of the abstract. NOTE: The results/data need to be in a format such as table, control charts, run charts, etc. Posters will require graphical display of data.

Conclusion: State conclusions supported by the results, implications for further improvement, if any, and what settings in which the improvement(s) would be effective.
