

District Energy Space 2020

Spotlighting Industry Growth

2020: More than 126 million square feet reported

Over 2.7 billion square feet reported since 1990

District Energy Space 2020

In a Challenging Year, Remarkable Industry Growth

Dedicated to the growth and utilization of district energy to enhance energy efficiency, provide more sustainable and reliable energy infrastructure, and contribute to improving the global environment.

The publication of *District Energy Space* has become an annual tradition for the International District Energy Association (IDEA) since 1990. Compilations beyond North America were initiated in 2004.

The 2020 issue features a compilation of data provided by our members including the number of buildings and their area in square feet that have been committed or recommitted to district energy service in North America during calendar year 2020, or previously unreported data from years past.

2020 was a year like no other due to the worldwide proliferation of the COVID-19 virus. Like so many in the energy sector, our industry faced many challenges. While undoubtedly many projects experienced delays, many forged ahead and highlighted how vital district energy is to a clean energy future. District Energy consistently meets the increased demand for decarbonization and a renewed focus on infrastructure. It creates good-paying jobs and building strong, interconnected communities.

How do we compile this data? Each year, IDEA asks its member systems to provide information on buildings that committed or recommitted to district energy service during the previous calendar year. To qualify for consideration in *District Energy Space*, a renewal must be a contracted building or space that had been scheduled to expire during the calendar year and was renewed under a contract with a duration of 10 years or more. Year-to-year rollover—simple continuation of service to existing buildings is not considered renewal.

For each building, *District Energy Space* provides the following information:

- Building name and/or type
- Service provider's name and location
- Building area served in square feet
- Services provided (heating, Domestic Hot Water, laundry, cooling, ice-making, pool warming, etc.)

District Energy Space not only enables IDEA to document the year-to-year growth experienced by our member systems, but also can be a valuable marketing asset for your organization.

District Energy Space 2020 and previous issues are available in PDF format by downloading from IDEA's Web site, <http://www.districtenergy.org/district-energy-space>

About IDEA – Established in 1909, the International District Energy Association (IDEA) serves as a vital communications and information hub for the district energy industry, connecting industry professionals and advancing the technology around the world. With headquarters just outside of Boston, Mass., IDEA comprises over 2,400 district heating and cooling system executives, managers, engineers, consultants and equipment suppliers from 23 countries. IDEA supports the growth and utilization of district energy as a means to conserve fuel, increase energy efficiency and resilience, and reduce emissions.

North America

Our members reported that they committed or recommitted **358** customer buildings in North America totaling **32,593,909** square feet (sq ft) of building space to district energy service during 2020 or, were buildings previously unreported. That compares with **334** buildings and **72,900,289** sq ft during 2019.

The North America total of **32,593,909** sq ft added in 2020 to IDEA's running total of square footage of **938,593,098** sq ft committed to North American district energy systems since 1990, brings the current total for North America reported since 1990 to **971,187,007** sq ft.

Beyond North America

IDEA is also pleased to be able to report strong system growth from beyond North America, which we have tracked since 2004. An additional **599** buildings and **94,244,974** sq ft were reported in 2020. That compares with 303 buildings and **108,493,596** sq ft reported for 2019.

The Beyond North America total of **94,244,974** sq ft added in 2020 to IDEA's running total of square footage of **1,589,027,442**

Beyond North America since 2004, brings the Beyond North America total reported since 2004 to **1,683,272,016** sq ft.

Totals: North America and Beyond North America

The combined building area reported added during 2020 in North America and Beyond North America is **126,838,883** sq ft. The total building area added, as reported to District Energy Space by our members since our tally began is **126,838,883** sq ft + **2,522,641,746** = **2,649,480,629** sq feet.

Stand Up and Be Recognized for 2021

Make plans now to photograph and enter your customer buildings that commit or recommit for your district energy service during calendar year 2020! The deadline for submittal of buildings for 2021 is **Friday, April 1, 2022**.

IDEA will congratulate and present awards to those systems reporting the largest growth for calendar 2021 for both North America and Beyond North America as part of the IDEA2021 event to be held in Austin, TX, June 14-17, 2021. We look forward to seeing you there!

2020 New Square Footage Reported*

Plan to submit your calendar 2021 growth data.

Make plans now to photograph and enter your customer buildings that commit or recommit for your district energy service during 2021!

The deadline for submittal of system growth data for calendar 2021 is Friday, April 1, 2022.

Continuing our tradition, during the IDEA 113th Annual Conference in Toronto, June 6-9, 2022, IDEA will congratulate and present awards to those systems reporting the largest growth for **calendar year 2021** for both North America and Beyond North America. We look forward to seeing you there!

To enter data for customers newly committed, recommitted or connected customers during calendar 2021, please download and complete the appropriate **North America** or **Beyond North America** Microsoft® Excel® submission form:

- [Submission Form – North America](#)
- [Submission Form – Beyond North America](#)

Please use the form as provided and fill in all appropriate cells to facilitate our compilation of the data. If you have a building that was committed in the last 5 years but you didn't report us to it in that time, please submit as well so we can get your data recognized in the 2021 issue.

Submit the final document to Jason Beal at jason.idea@districtenergy.org. We encourage you to send as many building photographs as possible, and label them clearly with your company name and identifying title such as: **"My Organization Name-Smith Office Building"**.

For more information and to access past issues of *District Energy Space*, visit: <https://www.districtenergy.org/resources/publications/district-energy-space>
