

IDEA Innovation Award 2022

Showcasing technology, engineering and operational innovation
within the district energy industry.

The **IDEA Innovation Award** showcases projects, collaborations, or programs that helped reduce energy usage, enhanced efficiency or strengthened reliability. These are projects that are replicable, with the potential for widespread application, have enhanced stakeholder community and demonstrated the value proposition of district energy to the marketplace.

The **2022 IDEA Innovation Award** will be presented at IDEA2022 at the Sheraton Centre Toronto Hotel in Toronto, June 6-9, 2022.

IDEA Innovation Award 2022

The **IDEA Innovation Award** helps our industry demonstrate how district energy systems deliver benefits to various constituencies including customers, communities, stakeholders, institutions, the environment and society in general.

The IDEA Innovation Award enables our members to share emerging best practices and collaborative applications. It is intended to create awareness of smaller projects and applications, not of the scale of IDEA System of the Year — processes that can be replicated and more widely used by others.

The IDEA Innovation Award should not be used to bring attention to a commercial technology, product improvement or technology innovation solely for commercial recognition. While such a product or technology may be innovative in design and use, it should not be a “product-centered” or proprietary effort. That is not the intent of this award.

All entries must be submitted by an IDEA member in good standing; however, there are no restrictions on the type of IDEA member (utility, campus, consultant, manufacturer, etc.) in order to cultivate participation and collaboration among operating systems, consultants and business partners. Multiple submissions per member site may be accepted.

IDEA Innovation Award Committee Chair Bob Smith presents Paul Zmick of UVA with the 2021 IDEA Innovation Award at IDEA2021 in Austin, TX.

Lulu Island Energy Company received the 2020 Innovation Award in a virtual awards event on December 16, 2020.

IDEA Innovation Award 2022

All information and images that are submitted must be publicly available information and able to be re-distributed without constraint of copyright or limitation. Submissions shall not be “commercial” in nature and not focused on proprietary technologies or applications.

Judging criteria will be weighted. Each of the four categories of Judging Criteria will be worth 25 points.

Applications will be reviewed and scored by a committee of senior IDEA members with a range of different backgrounds in the district energy industry.

Judging Criteria will include:

- 1 Innovation and Uniqueness**
The project/program should demonstrate a new innovation of operational ingenuity, either technical, operational or business practice.
- 2 Operational and Sustainable**
The project/program must be working and sustainable over time and should demonstrate improvement in energy efficiency and/or resource conservation.
- 3 Replicable**
The project/program should have the ability to be deployed in various locations, settings or applications and can be easily replicated.
- 4 Economic and Environmental Advantage**
The project/program should provide tangible economic and/or environmental benefits.

Gordon Judd from Clearway Energy Center San Francisco (middle) receives IDEA's 2019 Innovation Award from IDEA President and CEO, Rob Thornton (right) and Bob Smith, RMF Engineering (left) at IDEA's 110th Annual Conference & Trade Show on June 26th in Pittsburgh, PA.

Joan Kowal of Emory University and Bob Salvatelli of Sustainable Water accept the 2018 IDEA Innovation Award from (at left) Bob Smith of RMF and Chair of the Awards Committee and (at right) Rob Thornton of IDEA.

To enter, please complete the form on the following page and email your completed submission as a PDF to idea@districtenergy.org with the subject line: “2022 Innovation Award” by the deadline of Wednesday, April 6, 2022. If you have questions, please contact IDEA at +1-508-366-9339 or visit <http://bit.ly/InnovationAwardIDEA>.

The Annual IDEA Innovation Award Submittal Requirements

Please provide the information requested, following the outline below and the stated word limits. Please send completed submissions as a PDF to: idea@districtenergy.org by the deadline of **Wednesday, April 6, 2022**.

1. Project/Program Title
2. Name and Location of District Energy System or Project
3. Name of System Owner
4. Name, relationship to the project/program, address, phone number & email of the person submitting the application
5. Executive Summary – In 700 words or less, summarize the project /program, demonstrating the key aspects of what was done and the overall benefits.
6. In 300 words or less, explain how the project/program is innovative and unique.
7. With supporting data, demonstrate the improved energy efficiency benefit offered by the project/program, in 250 words or less.
8. With supporting data and graphics, explain the financial advantages of this project / program in 250 words or less.
9. In 250 words or less, please provide any additional information about the project/program (What challenges did you face? What plans do you have for the future? How did your customer base or community react?, etc.)
10. Please provide 3 to 5 attachments as images, diagrams or photographs in jpeg format with identifying captions.

AUTHORIZATION REQUIRED: By submitting an application, the submitter and owner agrees that the copyright of the content of the application is vested in IDEA. It is understood that authors retain the right to give other publishers permission to re-publish the contents of the application in their entirety or as subsequently edited or abbreviated as long as the IDEA Annual Innovation Award is given as the source and the re-use is not before the presentation of the awards, during IDEA2022. The author(s) further agrees that IDEA may permit such use of its copyright publications, as it deems proper, upon judicious considerations, through abstracts, quotations or excerpts. The primary author is responsible for the accuracy of the material submitted.
