FINANCIAL SUPPORT

This activity is supported by the Continuing Medical Education fund of Macy Health — St. Elizabeth Youngstown Hospital and from various vendors that will be listed in the symposium syllabus.

FACULTY DISCLOSURE STATEMENT

It is the policy of Mercy Health — St. Elizabeth Youngstown Hospital to insure balance, independence, objectivity, and scientific rigor in all its sponsored educational activities. This is in accordance with the ACCME Standards for Commercial Support, the guidelines of the Accreditation Council of Continuing Medical Education (ACCME) and the Ohio State Medical Association (OSMA). Anyone in a position to influence the content of these activities is required to disclose any relationships with pharmaceutical companies, biomedical devices manufacturers, or other corporations whose products or services are related to the subject matter of the presentation — with the exemption of government or nonprofit organizations or internal funds — so that Macy Health — St. Elizabeth Youngstown Hospital can ensure its CME activities are free of control by a commercial interest. If there is a conflict of interest, it must be resolved prior to the activity. An individual who refuses to disclose relevant financial relationships will be disqualified from any position that controls the content of an educational activity; full disclosures will be included in the syllabus distributed at the meeting.

*Sheila Doan, BSN, RN, CCRN, TCRN, CEN, EMT-P (Presenters and Planners have no real or perceived conflict of interest)
Why this seminar?
Trauma has been identified by the American College of Surgeons as the #1 killer of Americans ages 44 and under. Because of the urgency involved in treating trauma victims, it is especially imperative for physicians, nurses and other health care professionals to keep abreast of current practices in the management of these patients.
As an ACS Verified Level I Trauma Center, a teaching hospital and a major tertiary care center, Mercy Health — St. Elizabeth Youngstown Hospital is committed to providing ongoing trauma education opportunities. The goal of this symposium is to provide contemporary information related to the care of trauma patients. Please join us in welcoming several visiting lecturers who are experts in various aspects of trauma care.

Why these topics?
Topics for this symposium are based on literature review, identified public health issues and medical audit results.

Who should attend?
The topics presented are designed for multidisciplinary specialties involved in the care of trauma patients, including emergency physicians, surgeons, nurses, EMS providers, physical therapists and other health care professionals.
For your comfort, we recommend you bring a sweater since the conference rooms may be cool.

What are the objectives?
At the conclusion of this activity, participants should be able to:
1. Identify the elements of a trauma mass casualty.
2. Recognize the need for early blood transfusion in the trauma patient.
3. The medications available for pain and sedation with applications in the early post-trauma period.
4. Recognize life threatening bleeding.
5. Describe the prevalence of at-risk population.
6. Identify PTSD in first responders and discuss and practice effective self-care strategies.
7. Explain new technologies for hemorrhage control.

What are the objectives?
Topics and speakers are subject to change.
