Research Study
Nursing Research Networks
IRB-FY2019-3013

Do you conduct research or engage in translation of research?

Are you over 18 and able to speak and understand English?

Are you willing to share who you conduct research with and geo-location of research colleagues?

If you responded ‘YES’ to these three questions, we would like to invite you to participate in this survey research study with specific aims to:

1. Describe current research capacity of nurses
2. Describe makeup of research teams; roles, geographic co-locations, and modes of communication
3. Create a network analysis to further elucidate breadth, scope, and spread of nursing research work

There is no compensation for participating, however we hope to share the results at ENRS in 2020.

Please click on the link to participate in the study (https://www.surveymonkey.com/r/TYQZV85)
