

Tall Mass Timber Construction and Carbon Footprint Reduction

Thursday, January 28th, 2021
12:00-1:00 PM EST

Rhode Island ASCE
Presented by:
Ethan Martin, PE

Review the new codes allowing tall mass timber buildings up to 18-stories and 270' in height. See how these new construction types help push for better forest practices, meeting pollution reduction goals, and reducing embodied carbon to meet the SE2050 Challenge.
