Hello Section and Branch Presidents from Regions 3, 6, & 7,

Around a week ago we sent all Section and Branch Presidents an invite to the 2023 Workshop for Section, Branch, and Institute Leaders (WSBIL), which is part of the MRLC. We neglected to post a registration deadline. Since we are on a tight timeframe, we ask that your nominee register by November 18.

Sorry for the omission and thank you.

Nancy

MEMORANDUM

To: Section and Branch Presidents
From: Nancy E. Berson, Director, Global Geographic Services
Subject: 2023 Regions 3, 6 & 7 Workshop for Section, Branch, and Institute Leaders
Date: October 25, 2022

The Leader Training Committee is pleased to authorize you to nominate one delegate to participate in the 2023 ASCE Regions 3, 6, & 7 Workshop for Section, Branch and Institute Leaders (WSBIL), to be held Friday and Saturday, February 3-4 at the Embassy Suites by Hilton Denver Downtown Convention Center in Denver, CO. Sections without Branches may nominate two delegates.

Participation in the Workshop strengthens and expands the programs and activities of Sections and Branches through the interchange of ideas, information, and experiences, while it exposes incoming officers to the tools needed to be effective leaders. Concurrently, there will be a Workshop for Student Chapter Leaders and the Central Region Younger Member Council annual meeting. We have worked diligently to ensure the success of the program and look forward to your Section and/or Branch delegate’s participation.

To ensure that your Section and/or Branch receives the maximum possible benefit, you are encouraged to designate the President-elect, Vice President or Secretary/Treasurer as the delegate. If this is not possible, consider a Younger Member growing into a responsible position within the Section or Branch. (Please note that WSBIL attendees are only eligible for Society reimbursement once every four years.)

Registration:
The registration cost is $275.00 per attendee. This fee will help to subsidize general expenses for meals and refreshment breaks scheduled during the Workshop and is not reimbursable. Please register by November 18.

Supporting Documentation for Requests Beyond Agreement

- During scope coordination with Colleen Miller and in an effort to align the scope with overall budget range the following services were removed from the original proposed scope: Campaign and message development, content creation, graphic design services, media and advocacy training.
- Approval for A/V vendor cost and recognition of expenses beyond scope like print visuals and check-in table coordination.

Morreale is requesting a budget supplement agreement of $17,167 for requests made and services provided beyond the initial contracted scope at fees outlined in the original rate schedule.

Good afternoon!

Thank you for your leadership in ASCE and your support of the engineering profession! I contacted you recently about a research study of professional engineers, and I’m pleased to share that the survey is now available. The attached participant letter provides a brief introduction to the study and how to participate, and it provides a hyperlink to the survey (via Qualtrics.com). If you would, please share the participant letter with your members, as well as any other engineering colleagues who might like to participate. And I’d love to have you participate as well.

As I share in the letter, this study is unique in that it focuses on professional engineers and engineers in training. The study also breaks new ground by examining relationships among variables that have not been studied before. The 15-minute commitment to complete the survey is a valuable investment in our understanding of effective decision making at work.

Thank you for your time and consideration. If you have any questions, please don’t hesitate to contact me.

Dear Participant,

My name is Kyle Payne, and I am a doctoral candidate in the College of Business at Bellevue University. For my doctoral dissertation, I am conducting research on professional workers to identify the conditions under which employees make effective decisions at work. This study is unique in that it focuses on professional engineers and engineers in training, and it studies relationships among variables that have not previously been studied. With your help, the study’s results may help organizational leaders identify conditions that lead to more effective decision making at work.

I invite you to participate in this study via the online survey hyperlinked below. The survey has been approved by the Institutional Review Board at Bellevue University. It consists of multiple-choice questions, takes about fifteen minutes of your time, and can be completed on any internet-connected device. There are no known or anticipated risks to participating in the study, and your participation is voluntary. Your responses are anonymous and confidential. To complete the survey, please click here.

The survey will appear in a Qualtrics.com webpage via your internet browser. If you have any questions regarding the study, then you may contact my advisor, Dr. Greg Ashley, at greg.ashley@bellevue.edu, or you may contact me directly at kpayne@my365.bellevue.edu.

Thank you for your time and consideration.

Respectfully yours,

Kyle Payne
