

Precision Optical Sensing

Measuring What Matters with Cutting-Edge Optical Sensing Solutions

Over 30 Years of Excellence in Miniature Fiber Optic Spectroscopy

About Us

- **Founded:** 1989 by university researchers in Florida, USA
- **Mission:** To lead in creating precise yet practical optical solutions that enable researchers and industry to solve meaningful problems in health, safety, and the environment
- **Innovations:** Introduced first miniature spectrometer in 1992
- **Global Headquarters**
 - www.oceanoptics.com
 - sales@OceanOptics.com
 - FPC Rep: Ty.Olmstead@oceanoptics.com

Products & Services

- **Spectrometers:** Compact, flexible UV-vis, NIR, and Raman spectrometers
- **Photonics Systems:** Industrial-grade systems for material inspection, chemical identification, and quality assurance
- **Applications:** Biomedical, semiconductors, environmental, food & agriculture, safety & security
- **Markets Served:** Semi, Pharma, Academia, Medical

Our Commitment

- **Innovation:** Continuously refining and delivering new approaches to spectroscopy and imaging technologies.
- **Partnership:** Collaborating with customers to achieve ambitious goals and leveraging the power of light for advancements in health, safety, and the environment.
