

# MANUFACTURING MAINTENANCE TECHNICIAN APPRENTICESHIP PROGRAM

RELIABILITY DRIVES SUCCESS, BUT SKILLED TRAINING KEEPS IT RUNNING!

## DEVELOP A SKILLED WORKFORCE TO MEET YOUR NEEDS.

The Manufacturing Maintenance Technician is a fast track, 18-month registered apprenticeship program which focuses on the upkeep and repair of industrial machinery within a manufacturing facility, performing tasks like preventative maintenance, troubleshooting breakdowns, and making necessary repairs to ensure production equipment operates efficiently and safely; the training offers a broad range of technical skills including mechanical, electrical, and hydraulics to diagnose and fix issues with complex machinery.

## FLEXIBLE AND CONVENIENT

Online classes from Tooling U-SME offer top-tier manufacturing content designed by industry experts. Students gain 24/7 access to self-paced Related Technical Instructional (RTI) through an app available for phone and tablets.

## APPRENTICES BUILD A COMPREHENSIVE FOUNDATION OF KNOWLEDGE

This program introduces:

- PLCs & Automation
- Process Control Systems
- Predictive Maintenance
- Preventative Maintenance
- Fluid Systems
- Hydraulics and Pneumatics
- Motor Controls
- Electrical Theory
- Power Source
- In-Process Verification
- TPM Program
- WorkHolding
- Mechanical Systems
- Power Transmission Components
- Bearing Applications
- Spring Applications
- Belt Drive Applications
- Quality and Manufacturing Management
- Safety
- Rigging
