Deadline for manuscript  
submissions:

**20 December 2021**

### Message from the Guest Editors

Human behaviors are determined by multiple internal and external factors. Factors related to food safety behavior change are often described using health behavior theories. Such theories are used to explain and predict the implementation of safe food practices by consumers and food-handlers, and to develop interventions that will produce effective behavior changes.

In this Special Issue, important factors that influence food safety behaviors in primary production, processing, retail, and among consumers, will be explored. To increase our understanding of factors that influence behavior change and reduce the incidence of foodborne illness, high-quality research contributions are invited within the following fields of interest:

- Food safety knowledge, attitudes, and behaviors by stakeholders in primary production, processing, retail, preparation and consumption.
- Application and effectiveness of food safety education approaches/interventions
- Application of behavior change theories in food safety research.
- Role of healthcare providers in delivery of food safety information; implications for patients/consumers.

## Editor-in-Chief

### Prof. Dr. Christopher John Smith

Visiting Professor, Faculty of  
Clinical Sciences and Nutrition,  
University of Chester, Chester, UK

## Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [AGRICOLA](#), and many [other databases](#).

**Journal Rank:** [JCR](#) - Q1 (*Food Science & Technology*)
