Take the lead in applied geosciences

With Penn’s Master of Science in Applied Geosciences, you stay ahead of the curve in remediation practices.

Visit us at booth #122 and learn how our program can advance your industry expertise in:

- Geologic field methods
- Stormwater systems
- Project management
- HAZWOPER certification
- New technologies and techniques

Discover more about our full- and part-time flexibility for working professionals:

New from Norton Geosciences
Come see what’s NEW from Norton at Booth #227

Earth Science, Second Edition
Stephen Marshak • Robert Rauber
Help students see the world around them through a scientist’s eyes
Whether hiking along a mountain trail, driving down a highway, or making a decision about their energy usage, you want your students to see and assess the physical world they live in with more informed eyes. Through the most contemporary and applied text; the most vibrant visuals; and the most hands-on learning resources, Earth Science, Second Edition gets students leaving the class with a richer understanding of the science behind the physical world around them, and why it matters in their everyday lives.

Environmental Science and Sustainability
Daniel Sherman • David Montgomery
Make Environmental Science Personal
Environmental Science and Sustainability helps students discover their role in the environment and the impact of their choices. The authors bring scientific and environmental policy expertise to a modern treatment of environmental science; in addition to teaching climate change, sustainability, and resilience, they reveal how personal decisions affect our planet and our lives.

Guided Learning Explorations

NEW Guided Learning Explorations are carefully scaffolded online exercises that get students engaging in increasingly applied ways with geoscience topics.
