Society for Corporate Governance
Artificial Intelligence Education Programs for Boards of Directors
June 2026

This resource compiles selected US-focused director education programs, board briefings, governance forums, and resource centers that focus on or include coverage of artificial intelligence (AI), digital transformation, technology risk oversight, and related governance issues. The compilation is designed for governance professionals and board members seeking educational opportunities and resources to deepen understanding of AI strategy, oversight responsibilities, and emerging risks.

Programs included below are offered by universities, governance organizations, advisory firms, and executive education providers frequently referenced in director education guides published by major law firms and advisory organizations.

Program / Course	Host Organization	Description	Typical Timing	Format	Cost	Program Link
