Encourage Networking with Social Technology

Bring together professionals from across the country, retain young members and prospect for new members

CLIENT PROFILE | ASHP

The American Society of Health-System Pharmacists (ASHP) is a national professional membership association representing more than 40,000 pharmacists who practice in hospitals, health maintenance organizations, long-term care facilities, home care and other components of health care systems. With 180 staffers, ASHP is the only national organization of hospital and health-system pharmacists. It has a long history of improving medication use and enhancing patient safety.

THE CHALLENGE

Membership in ASHP has provided valuable networking opportunities for more than 50 years. But not every member is able to attend meetings and conferences to network with health system pharmacists in person. ASHP needed to enable networking regardless of location, while improving member retention, the prospect of new members and better overall visibility.

Likewise, the association has long struggled with obtaining accurate demographic information from students and young professionals, who move frequently and are in transition with their careers. In an increasingly “connected” society, ASHP was in danger of becoming an unimportant presence in the lives of its 35,000 members.

THE SOLUTION

ASHP chose Higher Logic’s online community platform, an industry leader in cloud-based networking, collaboration and mobile membership tools for associations and nonprofits. Higher Logic’s community platform integrated simply with ASHP’s existing Personify association management software solution.

AT A GLANCE:

The American Society of Health-System Pharmacists (ASHP)

- Headquartered in Bethesda, Maryland
- National professional association with more than 40,000 members and a staff of 180
- ASHP represents pharmacists who practice in hospitals, health maintenance organizations, long-term care facilities, home care and other components of health care systems
- Community site: ASHP Connect, connect.ashp.org
- Website: www.ashp.org
- AMS: Personify
- Public social media: Facebook, LinkedIn and Twitter

“ASHP’s greatest resource is its members, and ASHP Connect has been a powerful tool which has made it possible for members to easily exchange their knowledge by sharing information through discussion groups, blogs, events and documents.”

~ Aileen Holland
Marketing Manager, Membership
ASHP

www.higherlogic.com
ASHP chose Higher Logic’s community platform due to its built-in integration with ASHP’s member database Personify, product features, support and advanced functionality, as well as Higher Logic’s experience working with associations.

THE BENEFITS

There are now enhanced opportunities for networking and participation within the ASHP Community. Today members are accessing ASHP Connect to:

- Share documents, information and upcoming events with peers
- Learn from experts in the health-system pharmacy field
- Post, view and write blogs and definitions of key industry terms

BRINGING ASHP MEMBERS TOGETHER

ASHP enjoys a robust membership roll. But with 35,000 members spread across the country, it’s simply not possible for the organization to engage all of its health-system pharmacy professionals in person. The answer? A full-featured online community is the answer.

ASHP Connect provides ASHP members the necessary tools to communicate and collaborate with their peers, including discussion boards on a wide range of topics, and social networking tools like blogs and wikis. The site also allows members to form their own less formal smaller communities to connect, share, and earn within the larger system.

The member response to ASHP Connect was immediate and impressive. Within six months of launch, some 9,000 ASHP members—25 percent of the total number—were active users, far exceeding the association’s first-year goal of 5,000 users. The level of participation and the amount of user-generated content has surpassed internal expectation, and ASHP Connect has become a respected and highly praised forum in the health-system pharmacy industry.

NEW OPPORTUNITIES FOR SOCIAL INTEGRATION

Now closing in on 12,000 active users, ASHP Connect has given the association a meaningful contemporary, influential and innovative online presence. It has enhanced ASHP’s membership development initiatives, increase awareness of and participation in professional practice development programs, and reinforced the ASHP brand.

Even more benefits—for the organization and its members—are on the way. ASHP plans to use Higher Logic’s community to:

- Create separate but integrated “microsite” to extend online support activities for its two national-level member conferences
- Dynamically display user-generated announcements, discussion and blog posts about conferences directly on the ASHP Connect homepage

“ASHP Connect provides members with the social collaboration and engagement tools they want and helps staff improve operational effectiveness and drive brand value.”
