

ARUBA NETWORKING ESSENTIALS

Webinar series presented by Aruba Education Services

How does a message get routed on the Internet? What is a Network Address? a VLAN? You know that WiFi is now a basic human need, but you are stumped by how it all really works. The Aruba Networking Essentials webinar series is a starting point for individuals interested in a career as a networking professional, and for anyone who wants to get familiar with Aruba's leading technologies.

OVERVIEW

In Aruba Networking Essentials, you will learn what a basic computer network is, compare local and wide area networks, use cases, and implementation types. Communication over these networks relies on protocols. Once you learn about those, you will be well on your way to understanding network communications and well prepared to learn VLANs and how to configure an Aruba OS Switch!

Delivery will be three separate two-hour segments that build on one another combining lecture with live hands-on demonstration. We highly recommend attending all three sessions, the information learned in part 1 is prerequisite for parts 2 & 3. After participating in this webinar series you will have basic knowledge on Aruba's Switching solutions and a foundation to learn deeper technical skills. A certificate of completion will be provided for full attendance.

WEBINAR DATES & REGISTRATION

PART 1:

Monday, August 17, 2020 | 12-2PM PST [WATCH REPLAY](#)

PART 2:

Monday, August 24, 2020 | 12-2PM PST

PART 3:

Monday, August 31, 2020 | 12-2PM PST
