

ARUBA MOBILITY ESSENTIALS FOR THE INTELLIGENT EDGE

Two-part webinar presented by Aruba Education Services

OVERVIEW

In Aruba Mobility Essentials you learn how Radio Frequency (RF) works! You compare wired and wireless networks and understand how communication over wireless networks relies on standards and protocols. Once you learn about these, you will be well on your way to understanding what it takes to deploy and manage a WLAN and be familiar with Aruba's differentiated technology that makes it a leader at the Edge.

Webinar segments will build on one another combining lecture with live hands-on demonstration, we highly recommend attending both sessions. A certificate of completion will be provided for full attendance.

[Watch the previous webinar series on Aruba Networking Essentials to get caught up on wired fundamentals!](#)
