Db2 12 and the IBM Data Server Drivers with FL 501 and Above

Db2 12 has been available for over two years, and many customers have migrated to Db2 12 Function level 500. Function Level (FL) 500 enables all the new Db2 12 base capability and is equivalent to what we used to call New Function Mode (NFM) in Db2 11 and below. Now that customers are on FL 500, they are starting to look at FL 501 and beyond.
