

Celebrate IDUG's 30th Anniversary

The launch of Db2 on June 7, 1983 marked the birth of the relational database as the cornerstone for the enterprise. Technology has continued to revolutionize enterprises and 35 years later the relational database is stronger than ever exploiting new opportunities such as machine learning, artificial intelligence (AI) and analytics. IBM CEO Ginni Rometty says 80% of the world's data is where the 'real gold' is. "If I had to pick one word that IBM's reinventing around, it's 'data,'" Rometty told Cramer in a [wide-ranging interview](#) about Washington, Warren Buffet and AI.

2018 marks the 35th anniversary of IBM Db2 and the 30th anniversary of IDUG. To join IDUG's 30th anniversary celebrations please use this social media hashtag: #IDUG30

Register for Upcoming Conferences

Come and develop your skills and join the 30th anniversary celebrations:

- April 29 - May 3, 2018 in Philadelphia, Pennsylvania | [Register Now](#)
- November 4-8, 2018 in Malta | Save money and register early to take advantage of the Loyalty Rate Program - check the website for more information. [Call for presentations is open](#). Submit your presentation by March 19, 2018.

Upcoming Webinars Calendar

- [Are you a developer or application architected? Accelerate your development experiences with new Db2 12 technology!](#) November 28, 2017, 11:00 a.m. EST

SQL Tuning for Developers

When it comes to tuning a query, program, or even an application that most developers are not sure where to begin or what may be causing response time issue(s). This article is here to help!
