Join IDUG in Sydney

September 11-13, 2018

Early bird registration is still available for this year's IDUG conference in Sydney, which will feature a dedicated stream for application developers. Learn the best practices for developing high-performing Java applications for DB2, advanced SQL analysis and tuning techniques, how to best utilize DB2's built-in functions, and much more. All sessions will be led by international experts from IBM and experienced DB2 consultants. Make sure to forward this information to your developers.

Data Tech Summit 2018 San Jose, California

October 8-10, 2018

Early Bird Registration is OPEN

IBM and IDUG are teaming up to offer this three-day summit designed for Db2 professionals, architects, developers, and data scientists. With four content tracks, hands-on labs and workshops, and plenty of networking opportunities, this event will give attendees the opportunity to explore core and emerging technologies and trends.

Call for User Presentations is OPEN

IDUG is currently accepting user presentation abstracts for the Data Tech Summit in San Jose. This is your opportunity to share your Db2 experience and expertise with an audience of your peers. If your presentation abstract is selected for the conference, you will receive one complimentary registration.

Are you making the most of your Profile Tables for Db2 for z/OS?

With the ever-increasing number of features and functions being added to Db2 for z/OS it's easy to overlook the finer points of some of those features. Take in point the "Profile Tables."

You can create profiles to selectively control groups of distributed (DBAT) threads and connections, set thresholds for query acceleration (not covered in this article) or provide override properties to model your test subsystem to reflect the computing power of your production environment.
